On the Origin of Species

By Charles Darwin

CreateSpace Independent Publishing Platform. Paperback. Book Condition: New. This item is printed on demand. Paperback. 694 pages. Dimensions: 9.0in. x 6.0in. x 1.6in. On the Origin of Species, published on 24 November 1859, is a work of scientific literature by Charles Darwin which is considered to be the foundation of evolutionary biology. Its full title was On the Origin of Species by Means of Natural Selection, or the Preservation of Favoured Races in the Struggle for Life. Darwin's book introduced the scientific theory that populations evolve over the course of generations through a process of natural selection. It presented a body of evidence that the diversity of life arose by common descent through a branching pattern of evolution. Darwin included evidence that he had gathered on the Beagle expedition in the 1830s and his subsequent findings from research, correspondence, and experimentation. Charles Robert Darwin, FRS (12 February 1809–19 April 1882) was an English naturalist. He established that all species of life have descended over time from common ancestors, and proposed the scientific theory that this branching pattern of evolution resulted from a process he called natural selection. This item ships from La Vergne, TN. Paperback.

Reviews

This pdf is amazing. I actually have gone through it and that I am sure that I will be planning to read it once again in the future. You won't truly feel monotony at any moment of the time (that's what catalogs are for regarding when you request me).

-- **Wellington Connelly**

This is an awesome publication I have at any time read. Of course, it is playful, still an interesting and amazing literature. You will like just how the author wrote this book.
